Curb Roller

- ◆ **Curb Roller Manufacturing**, of Sabetha – Kansas is an innovator in Curb & Gutter forming with their development of the **Curb Roller** and the **Hydra Screed**.
- ◆ Both the **Curb Roller** and the **Hydra Screed** are hydraulically driven and utilize the concept of a rotating friction screed to strike off and shape the concrete.
- ◆ The **Curb Roller** is a totally new concept and is unique since it is the only roller screed designed exclusively for forming curb & gutters.

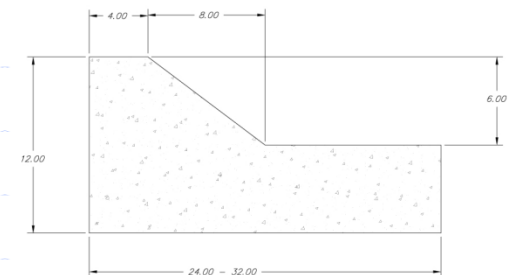

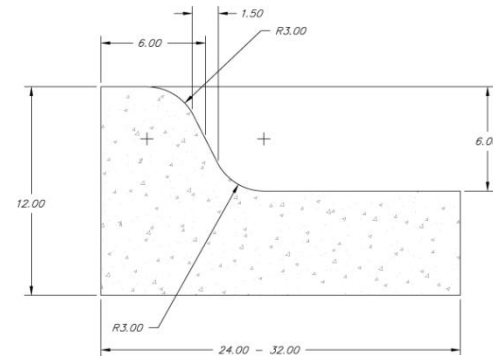

Curb Roller

◆ The innovative **Curb Roller** has many advantages:

- Inexpensive, actually costs less than forms
- Simple to use, No previous training necessary
- Compact, Easily Transportable
- High Productivity, Perfect Radiuses
- 5 Standard type Curb & Gutter Profile Drums
- Custom Curb Profile Drums
- Can be powered by a Hydra-Pak or off the hydraulic system of a road machine (skid steer, loader, grader, etc)

Curb Roller

◆ Hydra-Screed

- Uses the concept of friction generate by a sliding surface (spinning pipe) to screed and work concrete.
- Simple to use, No previous training necessary
- Compact, Easily Transportable
- Effective up to 8.5 meter widths
- Same drive handle for all pipe lengths / easily change
- Can be powered by a Hydra-Pak or off the hydraulic system of a road machine (skid steer, loader, grader, etc)

Hydra-Pak
